sent heavy receipts are expected to satisfy much of this inquiry, and some in the trade will be glad to see about to see a large accumulation of stocks. Cash-wheat premiums here were weak and lower figures also prevailed at outside markets.

Corn was affected by the break in wheat and on expectations of increased receipts from the West, the market for the week showed losses of 1-2 to 3 cents. The seaboard reported a fairly good export demand for corn, prices locally all of the new crop. Cash corn was 1-2 to 1-3 cents lower, with local demand for shipping.

Oats were weaker, with other grains closing with losses of 1-2 to 3 cents. The market was relatively weaker than the May, due to selling by an elevator for house, presumably in the way of hedging Northwest grain. Cash oats were 1-2 to 1-3 cents lower, and local sales totaled 125,000 bushels, which included 50,000 bushels for export.

Hog products ruled easier, chiefly in support of the heavy gains in grain. The volume of trading was small, coming largely from scattered commission houses.
